

Tub Drain Extractor™ 1-1/2" Tub Drain Removal Tool

New!

Lifetime Guarantee

When the crosshairs on your old tub drain are corroded and/or missing and the average drain removal tool fails, use the Tub Drain Extractor™ to remove those stubborn 1-1/2" tub drains. Never again will you need to chisel and hammer out the old drain and risk cracking the tub. This time saving tool does all the work with its helical knurl design. Simply drop the tool in the drain and turn it counterclockwise with a 1/2" ratchet drive and extension or wrench. The more torque that is applied to the tool the more it will "bite" into the drain and it will not slip. It's that simple.

- Remove stubborn 1-1/2" tub drains with 1/2" ratchet drive and extension or wrench
- Unique helical knurl "bites" into the drain and will not slip, the more torque applied the more "bite" on the drain
- Hardened steel design w/ gold plate finish
- Patent Pending design, made in the USA
