

Plumber's Knife Kit™ **New!**

Combination Multi-Tool for the DIY and Professional Plumber

The standard construction or workplace utility knife typically feature retractable and replaceable blades, made of either die-cast metal or molded plastic. They require a screw driver to replace blades. The SuperiorTool Plumbers Partner Multi-Tool features a durable stainless steel body with an anodized aluminum handle and a quick blade change feature that requires no tools. The blade is hidden in the handle during storage and is easily accessed with the thumb and locks safely in place. There is a second slot used for any standard reciprocating saw blade that will convert this tool into a saw. The tool also features a hardened steel reamer blade for copper and PVC tubing. The reamer blade is accessed with the thumb and folds back into the handle and is hidden when the job is complete.

- Durable Velcro close pouch with belt hook holds entire kit
- Compatible with standard reciprocating saw blades included for PVC, Wood, Sheetrock, & Copper, Aluminum, Steel
- Includes fold-out hardened steel reamer blade
- Quick change blade feature – no tools required
- Easy opening with thumb and locks securely in place for safety
- Stainless steel body with anodized aluminum handle
- Accepts both knife & standard reciprocating saw blades
- Ergonomic design with comfortable grip
- Lifetime guarantee (excluding blades)
